

Directory Services LTE Position
Applications Hosting Team
January 24, 2014

Description of Duties:

- Support of customers' administration requests by maintaining multiple Microsoft Active Directory (AD) domains and eDirectory identity stores.
- Assist with consolidation of domains by performing domain migrations to a single enterprise AD domain.
- Participate in project work such as: replacing the Wisconsin Access Management (WAMS) Proxy Service tools and the WAMS External Directory migration project by implementing the Oracle Identity Suite products.
- Audit and monitor the health of the directory environments.
- Maintain an enterprise Certificate Authority PKI environment.
- Prepare documentation.
- Create and maintain scripts, such as Powershell or Perl, for automating job processes.
- Research and recommended enhancements to simplify/streamline process and procedures
- Work with Security to develop and implement sound security practices and policies that balance the need for security and accessibility of systems.
